

DO IT FOR THE BIRDS AND THE BEES

*Planning to plant?
Think green and grow native.*

Think of them as Minnesota's "home grown stars" — native plants that have adapted to and naturally grow in our area. Native plants are hardy, drought resistant, and low-maintenance, saving time and money by reducing the need for watering, fertilizers and pesticides. Many have deep root systems that help the soil store water and reduce runoff. And above ground, they make great homes for our furry and feathered friends, bees and butterflies. Now isn't that a happy thought?
